Project: Modulewise Ecommerce, Food Delivery and Parcel Delivery system.

Description: This project is an online food delivery system from where users can order items and foods as per selected modules. Those modules are **Grocery, Food, Pharmacy, Shop and parcel.**

Front-end of this website has been developed by me and a junior developer under my instructions. I worked on companies boiler plate and build it from scratch. This site is totally developed on NextJS, ReactJS, React Toolkit, Material Ui, Redux toolkit and Styled components.

Deployed Live Link :- [6ammart](#)

Responsibility:

- Responsible for i**mplementing the whole figma design and project idea to ReactJS components..**
- Implementing **Business Logics, managing coordinates from users by Google map, managing project states by Redux toolkit and component states, guiding to implement Firebase push notification, guiding to implement a chatting system by using react query.**
- Implement **Dine In.**
- Implement **Firebase push notification.**
- implement **a chatting system** by using react query.
- **Implementing social logins (Facebook and Google)**
- Completing the whole system

Project: Admin panel for a service related ecommerce.

Description: This admin panel is developed for a service giving platform where providers can provide many services based on their zones. Front-end technologies are NextJS, ReactJS, Axios, Material Ui, Redux toolkit and React Query. I build this project structure from scratch and also implemented this alone.

Responsibility:

- Responsible for implementing whole figma design to ReactJS components.
- Responsible for implementing whole project from scratch
- Implemented Google Map Api for setting zones.
- Implementing Logic's for variations.
- Implementing every logic's

Software Development Skill

- Javascript, Typescript, ReactJS, NextJS, Redux, Redux toolkit, React Router Dom, React Query, Styled-components, REST API, MaterialUi, Html, CSS,sass, Javascript, Typescript and so on.
- Git, Trello, Jira, Slack
- Webstorm, Visual Studio Code.

Education

- **Daffodil International University**
  Dhaka, Bangladesh
  Bachelor of Software engineering : CGPA 2.8/4
